OLUJIMI A. AJIJOLA

Dr. Ajijola is an Assistant Professor in the departments of Medicine-Cardiology, and Molecular, Cellular, & Integrative Physiology at the University of California – Los Angeles (UCLA). Dr. Ajijola received his B.A. with Distinction from the University of Virginia, his medical degree from Duke University, and his Ph.D. in Molecular, Cellular, and Integrative Physiology from UCLA. His clinical training in internal medicine and cardiovascular diseases/cardiac electrophysiology were performed at the Massachusetts General Hospital/Harvard Medical School and at UCLA, respectively.

Dr. Ajijola's clinical and research interests revolve around innovative methods to control life-threatening cardiac arrhythmias by modulating the autonomic nervous system. His lab utilizes electrical, chemical, and computational tools to examine how cardiac injury remodels the autonomic nervous system, and how this dysregulation drives arrhythmogenesis. He is also an alumnus of the Howard Hughes Medical Institute's Medical Fellows Program, a recipient of the NIH Director's New Innovator Award (DP2), and a Young Physician Scientist Award from the American Society for Clinical Investigation.
